

COSMAS ONYEKWELU

Full-Stack Software Engineer

onyecosmas@gmail.com | +234 805 309 1974 | Lagos, Nigeria | Open to Remote
cosmasonyekwelu.com | github.com/cosmasonyekwelu | linkedin.com/in/cosmasonyekwelu

PROFESSIONAL SUMMARY

Backend-leaning Full-Stack Software Engineer with 2+ years delivering production-grade systems across CRM, fintech, HR/payroll SaaS, and real-time platforms using Node.js/Express, Django/DRF, React, TypeScript, PostgreSQL, and MongoDB. Skilled in multi-tenant SaaS architecture, secure API design, and authentication, with growing expertise in AI automation, integrating LLM APIs (OpenAI), and building webhook-driven workflows with n8n. Seeking Backend Engineer or Full-Stack Engineer roles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL

Frontend: React, TypeScript, Vite, Tailwind CSS, Zustand, TanStack Query, Recharts, Lucide React

Backend: Node.js, Express.js, Django, Django REST Framework, REST APIs, MVC Architecture

Databases: PostgreSQL, MySQL, MongoDB, Mongoose

Security & Multi-Tenancy: JWT, Cookie-based Authentication, TOTP/2FA, RBAC, Tenant Isolation, Input Validation

AI & Automation: OpenAI API Integration, n8n Workflow Automation, LLM-Powered Conversational Features, AI Agents, Prompt Engineering

Cloud & Deployment: Render, Vercel, MongoDB Atlas, Cloudinary

Real-time: WebSockets

Testing, Documentation & Tooling: Postman, Swagger/OpenAPI, Git, GitHub Actions (CI/CD)

PROFESSIONAL EXPERIENCE

AI Tutor Intern — Tech Studio Academy

Lagos, Nigeria | April 2026 – May 2026

- Delivered weekly technical presentations and teaching sessions on AI automation concepts and their practical applications.
- Designed and presented hands-on workflows involving AI agents, APIs, workflow automation, and business process automation.
- Built an AI-powered HR automation workflow using n8n and LLM-based services, integrating multiple services to automate business processes.
- Developed practical experience in AI agents, prompt engineering, workflow orchestration, API integration, and technical communication.

Independent Full-Stack Developer — Self-Employed / Global Remote

Global Remote | February 2024 – Present

- Delivered 6+ end-to-end web products across CRM, real-time social, HR/payroll SaaS, and fintech use cases, owning system design, implementation, testing, deployment, and documentation.
- Designed modular REST APIs with clean MVC separation and standardized validation, error handling, and pagination, simplifying client integrations and feature expansion.
- Implemented secure authentication and authorization flows (JWT, httpOnly cookies, RBAC, optional TOTP 2FA) and multi-tenant data isolation to protect user and financial data across web platforms.

- Built and deployed responsive React/TypeScript frontends with Vite and Tailwind on Vercel, and supported backend services on Render for production-ready delivery.
- Modeled data across SQL and NoSQL systems, defining migration-safe schemas, constraints, and validation rules to improve integrity and maintainability.
- Automated regression checks with Postman collections and GitHub Actions CI, and built n8n webhook workflows with OpenAI integration for AI-assisted automation, helping catch breaking changes before production.

Web Developer Intern — Value Gate Consulting

Abuja, Nigeria (Remote) | October 2025 – March 2026

- Contributed to client-facing web applications and internal tools as part of the digital transformation and product development practice, building scalable backend services with Node.js/Express or Django and integrating React frontends.
- Designed and implemented secure RESTful APIs with JWT authentication, RBAC, and input validation, supporting business strategy and data-driven client solutions.
- Optimized PostgreSQL and MongoDB data models and real-time features, improving application performance and enabling faster decision-making for consulting engagements.
- Participated in Agile sprints, code reviews, Postman testing, and CI/CD workflows (GitHub Actions), delivering production-ready features for business process outsourcing and strategy consulting.

Full-Stack Web Developer Intern — Tech Studio Academy

Lagos, Nigeria | December 2025 – February 2026

- Built and deployed full-stack features for internal platforms and training projects using React (Vite + Tailwind), Node.js/Express or Django, MongoDB/PostgreSQL, and WebSockets.
- Implemented secure authentication flows (JWT, httpOnly cookies, optional TOTP 2FA) and role-based access control aligned with production security standards.
- Developed responsive, mobile-first UIs with TanStack Query and documented APIs using Swagger/OpenAPI for smoother team handoff and testing.
- Automated API testing and regression checks with Postman while collaborating on live projects in an Agile, mentorship-driven environment.

SELECTED PROJECTS

IntelliHR: Multi-Tenant HR & Payroll SaaS Platform

React, TypeScript, Node.js, Express, MongoDB, n8n, OpenAI API

- Architected a multi-tenant HR and payroll SaaS platform from scratch, with each company created by an HR Manager at signup and all data strictly scoped by companyId issued in JWTs, enforcing tenant isolation at the query level.
- Built the full employee lifecycle (invite, register, promote, transfer, warn, suspend, terminate, resign), attendance tracking, leave management, and payroll runs behind a strict two-role access model (HR, employee).
- Orchestrated n8n workflows for webhook-triggered automation, including email invites, password resets, attendance reminders, leave notifications, payroll triggers, email digests, and Slack alerts, secured with webhook secret verification.
- Implemented a secure employee invitation flow (HR-issued invites, token-based registration) and a complete REST API covering auth, password reset, and CRUD for employees, leave types, attendance, payroll, and profiles.
- Shipped a production-ready deployment on Render with a full TypeScript build pipeline, Render Blueprint (render.yaml), Mongoose schema validation, CORS, and security hardening.

OTCBook: OTC Bookkeeping & Portfolio Management Platform

Django, Django REST Framework, PostgreSQL, JWT, AI APIs, PDF Generation

- Built a trade and portfolio ledger for Nigerian OTC desks to track positions and risk exposure, with role-based workflows for Admin, Trader, and Viewer users.
- Generated downloadable PDF risk and analytics reports for compliance and record-keeping via server-side report generation.
- Integrated AI-assisted trade review and performance insights while enforcing permissions, input validation, and audit-friendly logging.

TwitterPlus: Real-Time Social Platform

React, Node.js, MongoDB, WebSockets | Deployed on Vercel (frontend) and Render (backend)

- Built core social features including timelines, likes, follows, direct messaging, and notifications with WebSocket-based real-time updates.
- Designed secure authentication and session handling, and delivered a mobile-first UI optimized for accessibility and performance.
- Served media and dynamic social interactions through a production-ready Node.js/MongoDB backend deployed on Render.

Zura CRM: Customer Relationship Management System

Node.js, Express, MongoDB, React | Deployed on Vercel (frontend) and Render (backend); APIs documented with Swagger UI

- Implemented CRM workflows for leads, deals, invoices, documents, and calendar tasks, protected by RBAC across user roles.
- Built and integrated REST APIs with a responsive React frontend to streamline daily sales and admin operations.
- Documented APIs with Swagger UI and structured the stack for remote-ready deployment across frontend and backend.

Additional Projects: Bitcoin Transaction Screenshot Generator (React, Tailwind) • BetaHouse Real Estate Platform (Node.js, Express, MongoDB, React) • WorkNest Backend API (Node.js, Express, MongoDB, Render, Swagger UI)

CERTIFICATIONS & COURSES

AI Unlocked: Agents and Skills — Binance Academy

Issued: August 2026 | Certificate: AI Agents & Skills for Crypto Trading Workflows

Claude 101 — Anthropic Education

Completed: July 2026

AI Fluency: Framework & Foundations — Anthropic Education

Completed: July 2026

AI Automation: Build LLM Apps & AI Agents with n8n & APIs — Udemy

- Designed and built AI-powered automation workflows using n8n and integrated LLM APIs (OpenAI) into business processes.

Backend Development with Python/Django — Univelcity

September 2025 – December 2025 | Python, Django, PostgreSQL, REST APIs, Authentication, Deployment

Software Engineering — Saylor Academy

November 2025 – December 2025 | Foundations in software design principles, architecture, and engineering best practices

Back-End Web Development — New Horizons

May 2025 – August 2025 | PHP, Laravel, MySQL, REST APIs, Git/GitHub, Node.js, MongoDB, AI integration and automation

Full-Stack Web Development (JavaScript) — Tech Studio Academy

October 2024 – February 2025 | HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, Git/GitHub
